

Harvest the addresses of the SIA.ch website

On this page you find 4 categories of member addresses:

<http://www.sia.ch/en/membership/member-directory/>

- [honorary members](#)
- [individual members](#)
- [corporate members](#)
- [student members](#)

can you please download these for me and put them into an excel or csv table:

An example:

From this list you harvest the first fields:

<http://www.sia.ch/en/membership/member-directory/individual-members/>

Name, professional group, Zip (postal code), city,

then you lookup the link under the name and get more detailed data:

<http://www.sia.ch/en/membership/member-directory/individual-members/m/214793/>
